

ACRYLITE® Crystal Ice acrylic sheet

A cool frosted surface that harnesses light

ACRYLITE® Crystal Ice acrylic sheet has a substantially textured, frosted surface that diffuses light to enhance your design options and backlit applications. Its cool frosted surface resists fingerprints and is easy to clean. Lightweight and impact resistant, it is built to endure everyday contact and will maintain its look for years.

Available in colorless and four colors, ACRYLITE Crystal Ice sheet, with its crystal clear edge, has the appearance of etched glass. It is a beautiful choice for decorative and functional design elements of trade show exhibits, P-O-P displays and store fixtures, interior design or furniture.

Features & Benefits

- High light transmission
- Even light diffusion
- Fingerprint and mar resistant
- Easy to fabricate
- Can be flame polished without effecting the frosted texture

Product Specifications

- Size: 49" x 97"
- Thicknesses: .118" .177" .236" .354"
- Colors: Colorless, glass green, blue, 2 shades of white, and black
- Frosted surface available on one side (SC) or both sides (DC)

The Perfect Complement – ACRIFIX™ Special Bonding Agents

Use ACRIFIX™ 2R 0195 reactive cement, with its unique satin finish, to create strong and seamless joints with textured, light-diffusing products. Or, if you prefer a non-methylene chloride solvent cement, use ACRIFIX™ 1S 0117 which has superior capillary action for better flow through and is quick drying.
