

ACRYLITE® GP & ACRYLITE® FF Infrared Transmitting (IRT) acrylic sheet

ACRYLITE® Infrared Transmitting (IRT) sheet is specifically formulated for projects requiring ultraviolet (UV) and visible light blockage while allowing infrared (IR) transmission. ACRYLITE IRT sheet is designed to transmit infrared light but to absorb visible light. It is ideal for use in applications where it is desirable to conceal infrared security cameras or infrared transmitters and receivers.

ACRYLITE IRT sheet is available in both cell cast (GP black 8C42 and 9C20) and continuously manufactured (FF black 8C042 and 9K020) grades. The physical properties and fabrication techniques of this product are the same as standard ACRYLITE GP and ACRYLITE FF sheet.

Standard Product Offering

Thicknesses: .118", .177" and .236"

Size: 48" x 96"

Colors: Black – 8C42, 9C20 (GP)
and 8C042, 9K020 (FF)
